Educational Qualifications.

1. Undergraduate MBBS
2. Post Graduate DNB (General Medicine)
3. Speciality Training on Rheumatology, Critical care and Nephrology

Details of Training and Experience

1. Undergraduate:

I have graduated (MBBS) from the premier institution in Eastern India, Medical College Calcutta. This is one of the most prestigious medical schools in Asia, and during my training I had the opportunity to get acquainted with the various medical specialties to help chose my correct postgraduate training programme. I had received medals and awards during my undergraduate training.

2. Post Graduate:

I have had extensive experience within a structured training programme in managing patients with various medical problems related to different super-specialties and sub specialties. During my training I have had in depth experience in managing critically ill patients like cardiological emergencies, septic shock, dyselectrolytemia , cerebrovascular accident , poisoning/snake bite, different gastroenterological complications. I have managed both indoor and outdoor patients of medical illnesses .During the training, I have done many invasive procedures like joint aspiration, synovial biopsy and intra-articular injections, renal biopsy, liver biopsy, cerebrospinal fluid aspiration, central venous catheter insertion in different areas. I was posted in ICCU, ITU and managed critically ill patients in regular basis.

3. Specialty Training

I have been practicing as a consultant in Internal Medicine and Critical Care in West Bengal, (Initially as Senior Medical Officer in NTPC Farakka, followed by as Leading Consultant in The Mission Hospital , Durgapur, West Bengal) following my Senior residency(Academic) in the Dept. of General Medicine and Nephrology in Safderjang Hospital and varddhamann Mahavir Medical College, New Delhi. These prestigious posts have helped me gain immense confidence and satisfaction not only with providing the best possible clinical care but also with taking up the challenge of setting up a new Department (Dept of Internal Medicine)in a center which is primarily dedicated to cancer care. I have had first hand experience in setting up a new centre and Department of Internal Medicine from the beginning in Tata

Medical Center. During my specialty training days, I have got the opportunity to work under Dr Anand A Malviya in his Institute of Spinal Injury Center in New Delhi and learnt practical aspects of Rheumatology and its complications.
